

**Looking for a safe NATURAL supportive treatment for ...
Candida infections, sore throats, flues, intestinal upset and much more?**

TRIGUARD[®] PLUS

TRIGUARD[®] PLUS is a natural quaternary compound synthesized from the seed and pulp of certified organically grown grapefruit combined with water-soluble tea tree oil and colloidal gold. The manufacturing process converts grapefruit bioflavonoid (polyphenolics); into an extremely potent compound that has been proven highly effective in numerous applications. TRIGUARD[®] PLUS is used by healthcare professionals worldwide as nutritional support for individuals with certain health concerns.

TRIGUARD[®] PLUS is a broad spectrum antimicrobial compound synthesized from the seeds and pulp of grapefruit.

TRIGUARD[®] PLUS is an extremely potent and effective broad spectrum bactericide, fungicide, antiviral and antiparasitic compound. TRIGUARD[®] PLUS is environmentally safe with a low toxicity to man and animals.

TRIGUARD[®] PLUS is a powerful anti-microbial that acts against a large number of pathogenic BACTERIA, FUNGI AND VIRUSES and is presently the natural prophylactic with the broadest spectrum action against diseases that attack animals.

TRIGUARD[®] PLUS is a powerful fungicide that acts against fungi of the following genera: Aspergillus, Penicillium, Trichophyton, Fusarium, Pullularia, Microsporus Candida, Epidermophyton.

TRIGUARD[®] PLUS has excellent action against the following viruses: Avian Infectious Bronchitis, Avian Smallpox, Avian Encephalomyelitis, Marek's Disease, Aphthous Fever, New Castle, Vesicular Swine Disease, African swine fever.

Why would I want to use the TRIGUARD[®] PLUS?

As a natural, non-toxic compound our TRIGUARD[®] PLUS has many uses. Internally, the concentrate is useful as a supportive treatment for a wide variety of ailments, including Candida infections, sore throats, flues, intestinal upset, etc.

How can the product be non-toxic if it is so potent?

Extensive testing done at independent laboratories and universities around the world has proven the concentrate to be safe for human consumption. It is effective against pathogens because it belongs to a family of compounds known as quaternary compounds. This family is best known for benzylkonium chloride and benzylthonium chloride as well as the infamous Quaternium group, a very toxic antimicrobial preservative used in the cosmetics industry. While TRIGUARD[®] PLUS is molecularly similar to these compounds, there are some profound differences in structure and function. Studies done to date indicate that there is little danger in either short-term or long-term internal use.

Is this product safe for use with children?

Yes. The extract is frequently used in pediatric medicine in applications such as diaper rash, ear infections, abrasions, etc. Common sense will indicate using a very dilute solution on an infant.

What about using it for my pets?

Since the TRIGUARD[®] PLUS is safe for consumption, it is well suited for animal uses. The extract can be added to the animal's water or food.

Is there anything I can't use TRIGUARD[®] PLUS for?

We do not recommend using it in your eyes, even in a dilute form. We also advise users to dilute the extract before use. If you place a drop of the product on your tongue, it will burn. Sensitive skin areas also will end up with an unpleasant irritation if the concentrate is used full-strength.

*****Caution: Do not put in eyes. Do not use full strength in mouth, ears, nose or sensitive areas. May cause irritation if used full strength on skin.**
